Broadening Our Perspective: Grand Canyon Regional Rock Art

A Presentation by Steve Freers

The 2013 book, *Rock Art of the Grand Canyon Region*, presented a comprehensive overview of a subject that could not be fully fleshed out in one convenient volume. There are any more interesting rock art expressions that exist in the area, exhibiting traits that augment or challenge our assumptions regarding their creation. New discoveries continue to be made, as well as greater appreciation of the more subtle expressions at well-know localities. Historic personalities also interacted significantly with rock surfaces in the region, adding yet another layer of human interaction in an already complex milieu. This presentation by co-author Steve Freers will expand upon the book's narrative and take a deeper dive into the rock art that exists within the Canyon's greater ecosystem.
